

Application: Hotel

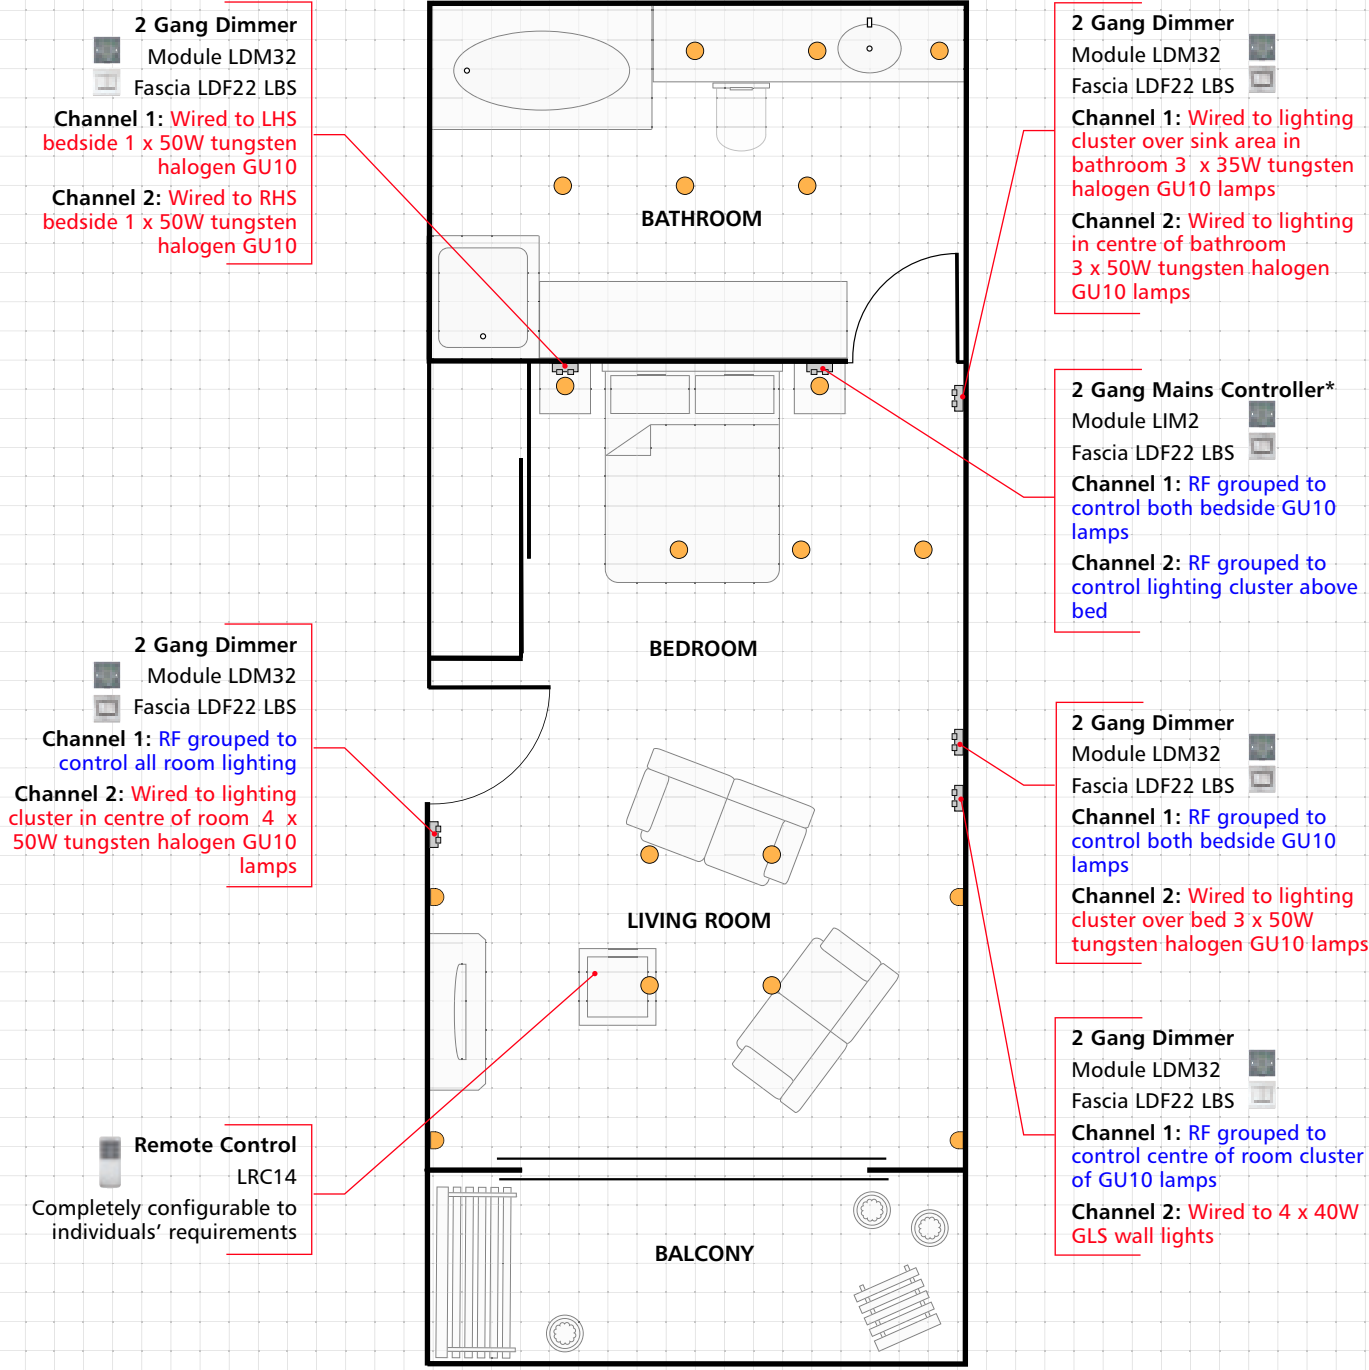

This is a one bedroom open plan hotel room, with outside balcony area.

The hotel chain has specified the finish of Lacquered Brushed Stainless Steel to complement the modern interior design scheme.

Significant control is given to the occupant, culminating in a fully tailored Remote Control. In addition the following capability is offered:

- The lights within the bedroom space can be controlled from both sides of the bed and from the wall as this section of the room is entered - to provide the uppermost in convenience
- Lighting within the living area can be controlled collectively or as individual circuits from either side of the room, or by using the Remote Control whilst watching the television
- On leaving the room, a single button can turn off all the lighting if desired
- As with all astral installations, additional Battery Controllers can be positioned at any point to fit the needs of the user
